

I'm a software engineer with 2.5 years of experience developing mobile apps using Flutter. Experienced in developing and maintaining high-performance applications while delivering new features and ensuring application stability. Experienced in supporting internal projects using Node.js, React, and SQL Server. Proficient in JavaScript. Dedicated to driving continuous improvement and providing reliable support for company-wide projects. Able to work within cross-functional teams. Interested in utilizing technical skills to build new software.

Experience

DataFloat – Software Engineer

FEB 2022 - PRESENT

- ❖ Actively involved in the development and maintenance of mobile applications using Flutter, ensuring high performance, reliability, and seamless user experience.
- ❖ Collaborate with cross-functional teams to design, develop, and implement new features, contributing to the continuous improvement of the application.
- ❖ Maintain and optimize existing codebases, troubleshoot and resolve bugs, and ensure consistent application performance.
- ❖ Provide support and maintenance for a company's internal project, utilizing React for the front end and Node.js for the backend, with SQL Server as the database management system
- ❖ Work closely with other developers, designers, and stakeholders in an Agile environment, contributing to sprint planning, code reviews, and collaborative problem-solving
- ❖ Utilize proficiency in programming languages such as JavaScript and tools like SQL Server Management Studio to support both frontend and backend development tasks

Flutter, Dart, Nodejs, JavaScript, SQL, React, .NET

Projects

Real Time Drowsy Driving Detection and Alert System – Academic Project

- ❖ A drowsy driver alert system detects eye closure for a few seconds and alerts the driver using the Dlib library and 68-face landmark dataset.

Python

Online Wine Shop System – Academic Project

- ❖ An online wine store offering a variety of wines for different occasions, featuring customer registration, login, wine categories, cart, online payment, gallery, and customer feedback

ASP.NET, SQL Server

Education

Mahatma Gandhi University – Dual Degree Master of Computer Application

JUNE 2016 - MAY 2021, Kochi – India

Kerala State Education Board– Higher Secondary Education

JUNE 2014 - MARCH 2016, Kochi – India
